urban Kenya, the ideas of complex systems industry, and are ill-suited to the world we face today. The problems and systems aid agencies deal with on a daily basis have more in common with ecosystems than machines: they are interconnected, diverse, and dynamic; they cannot be just simply re-engineered or fixed. Outside of aid, social scientists, economists, business leaders, and policy makers have started applying innovative and scientific approaches to such problems, informed by ideas from the 'new science' of complex adaptive systems. Inspired by these efforts, aid practitioners and researchers have started experimenting with such approaches in their own work. This book showcases the experiences, insights, and often remarkable results of innovative thinkers and practitioners who are working to bring these approaches into the mainstream of aid. From transforming child malnutrition to rethinking economic growth, from building peace to reversing desertification, from rural Vietnam to

Aid on the Edge of Chaos argues that such ideas and approaches should play a vital part of the transformation of aid. Aid should move from being an imperfect post-World War II global resource transfer system, to a new form of global cooperation that is truly fit for the twenty-first century.

Aid on the Edge of Chaos - Ben Ramalingam - 2013-10-24

Aid has become a tangle of donors and recipients, so unwieldy that it is in danger of collapse. This ground-breaking book presents fresh thinking that transcends the 'more' verses 'less' arguments. Drawing on complexity theory it shows how aid could be transformed into a truly dynamic form of global cooperation fit for the twenty-first century.

Senate Bill - Virginia. General Assembly. Senate Stiglitz.

Capacity for Development - Sakiko Fukuda-Parr - 2002

Leading experts consider how development programs can increase the levels of knowledge, skill, technical know-how and productive capacity of populations in the South. The volume is organized into three parts on ownership, institutional capital and knowledge networks. They explore the participatory empowerment that builds capacity, a framework enabling social forces to contribute, and a new paradigm of knowledge in the network age. The result shows how, in future productivity, capacity development through technical cooperation can be successfully pursued. Contributors include Sunil Chako, Steve Denning, Sakiko Fukuda-Parr, Ruth Hill, Sanjay Lall, Carlos Lopes, Khalid Malik, Thandika Mkandawire, Raj Panday, and Joseph Stiglitz.

Shell Shocked - Mohammed Omer - 2015-11-30
Operation Protective Edge, launched in early July 2014, was the third major Israeli assault on the Gaza Strip in six years. It was also the most deadly. By the conclusion of hostilities some seven weeks later, 2,200 of Gaza's population had been killed, and more than 10,000 injured. In these pages, journalist Mohammed Omer, a resident of Gaza who lived through the terror of those days with his wife and then three-month-old son, provides a first-hand account of life on-the-ground during Israel's assault. The images he records in this extraordinary chronicle are a literary equivalent of Goya's "Disasters of War": children's corpses stuffed into vegetable refrigerators, pointlessly because the electricity is off; a family rushing out of their home after a

had been killed, and more than 10,000 injured. In that the building will be obliterated by an F-16 missile in three minutes; donkeys machine-gunned by Israeli soldiers under instructions to shoot anything that moves; graveyards targeted with shells so that mourners can no longer tell where their relatives are buried; fishing boats ablaze in the harbor. Throughout this carnage, Omer maintains the cool detachment of the professional journalist, determined to create a precise record of what is occurring in front of him. But between his lines the outrage boils, and we are left to wonder how a society such as Israel, widely-praised in the West as democratic and civilized, can visit such monstrosities on a trapped and helpless population.

I Glanced Out the Window and Saw the Edge of the World - Catherine Halsall - 2020-07-08
This book is about WAR--not the causes and

upright, with the Lord's Prayer or the Shema the artillery and the bombs. It is about the heinous crimes committed by the combatants, the horrifying experiences of civilians, the devastation of cities and villages, the killing and the dying, the glory leading to revulsion and guilt, and the assimilation of suffering that either ends in death or in the triumph of the soul. It looks at the struggle of the church to remain faithful and the servants of the church who seek to bring sense and solace to the victims. It discusses antisemitism, racism, and war itself from biblical perspectives. It reveals the unjustifiable reasons for engaging in war and how this brings catastrophic results for all peoples--the mental instability of the survivors and the loss and grief of those on the home front. In war, how can men and women carry out the actions that they do? As Viktor Frankl writes: "After all, man is that being who has invented the gas chambers of Auschwitz; however, he is also that being who has entered those gas chambers

Yisrael on his lips."

From Poverty to Power, 2nd Edition - Duncan Green - 2012

From Poverty to Power argues that a radical redistribution of power, opportunities, and assets rather than traditional models of charitable or government aid is required to break the cycle of poverty and inequality. The forces driving this transformation are active citizens and effective states. Published in association with Oxfam GB.

Foreign Policy and Economic Dependence -

Neil R. Richardson - 1978-11-01

In an era of increasing interdependence among nations, the foreign policies of poor countries are becoming a subject of critical interest to scholars and the public alike. Neil R. Richardson adopts a political economy perspective to examine the foreign policy repercussions of international economic dependence. Are dependent countries compliant in their foreign policies, acquiescing to the preferences of the industrial giants on which they rely for foreign trade, investment, and aid revenues? Or are they instead prepared to defy

major concerns of Richardson's rigorous investigation. The book begins with a characterization of economic dependence and its possible impact on the foreign policy decisions of dependent governments. Ideas from both "interdependence" and dependencia scholarship are extracted in order to explain the reliance of poor countries on their rich partners. These economics are linked to the foreign policies of poorer countries by considering how the mechanisms of dependence may create pressures on foreign policymakers. Several combinations of pressures are plausible, and each set yields a differing expectation about their foreign policies. The second part of the book is an empirical test of these foreign policy predictions for the years 1950-1973. Richardson analyzes the foreign policy behavior (as reflected in certain votes in the United Nations General Assembly) of a number of poor countries that are economically dependent on the United States to varying

becoming a subject of critical interest to scholars conclusions. Contrary to one common assumption, these mostly Latin American and Caribbean countries are not necessarily locked into a condition of perpetual dependence. Richardson finds that the foreign policies of the economic dependencies are not easily manipulated by the United States. Not only do annual changes in their external economic reliance fail to correspond to their U.N. voting behavior, but the dependencies as a group are no longer clear voting allies of the United States after the late 1960s. These and other results bear theoretical and policy implications that conclude the book. Foreign Policy and Economic Dependence will be of interest to specialists in quantitative international relations and American foreign policy.
